

sosintel.co.uk

We are your eyes and ears online,
**even in the darkest
places.**

Making cyber threat intelligence + Dark Web monitoring affordable and accessible to everyone. With the ever increasing threat of companies and organisations being subject to a cyber-incident, SOS Intelligence allows you to sleep easier at night.

Why do you need **SOS Intelligence**?

The results of a GOV.UK survey released in March 2020 confirms cyber security breaches are becoming more frequent.

It found 46% of UK businesses and charities reported a cyber-attack during the year. Of those, 33% claimed they experienced a cyber breach in 2020 at least once a week – up from 22% in 2017.

We can help you avoid the question from your CEO or MD...

Why didn't **we** know about this?

Simply put, we monitor keywords, email addresses, domains and more online including the Dark Web, so you get to know immediately if your data has been leaked.

You can then do something about it.

Don't be put that in awkward position...Our solution is easy to implement **and** affordable.

We are your eyes and ears online, even in the darkest places.

SOS Intelligence has provided us with cost-effective and timely threat intelligence. The dark web monitoring and alerting allows us to reassure and help our customers to mitigate potential attack vectors on their infrastructure. The platform is easy to use, with manageable alerting. SOS Intelligence has fantastic customer support and is always meeting our never-ending requirements with feature requests being implemented in record time.

David Batho
Head of Protective Services at Jisc

We understand the risks.

We understand your risks.

You are a busy business handling not only internal data, but also client data. It's held across multiple platforms and you understand the need for security...but you are always vulnerable.

Our mission is to make Digital Risk Monitoring affordable and accessible for you. A solution that is up and running in minutes.

There will be winners and losers in this ever-evolving threat environment. Those who take active and precautionary measures monitoring cyber-threats, and those who don't.

Which one are you?

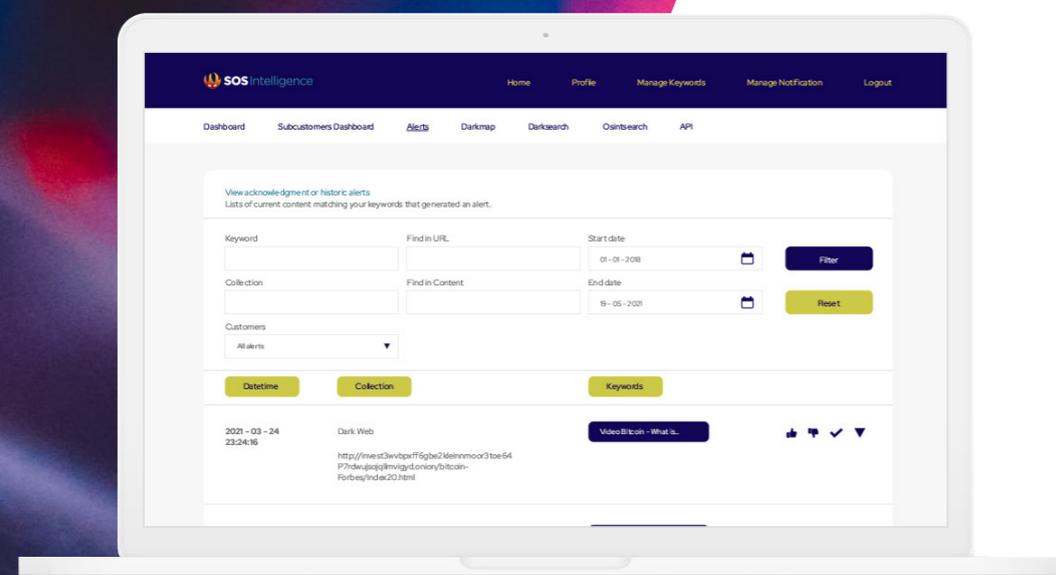

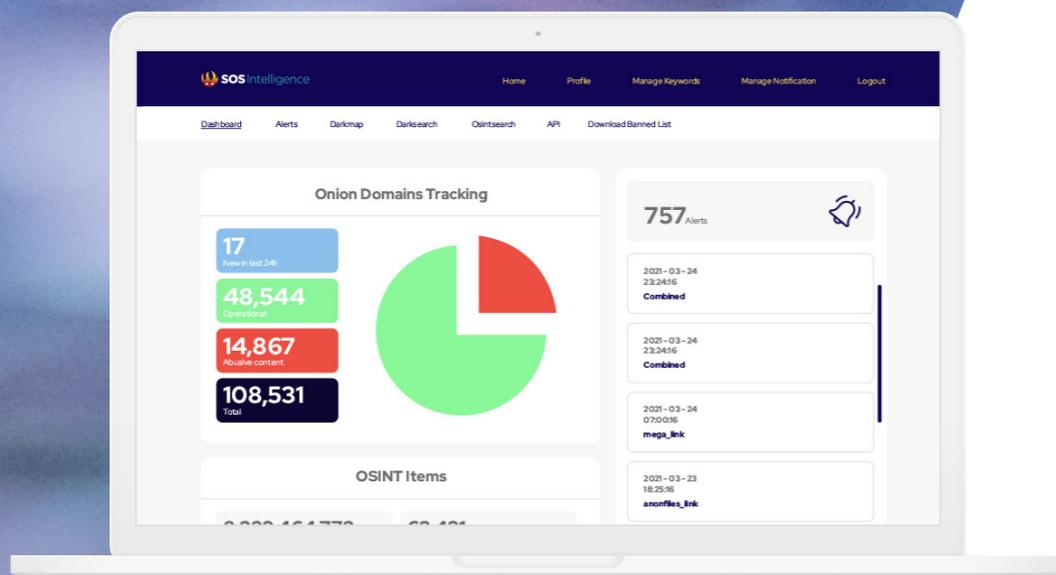

We can help you sleep easier at night with our Curated Actionable Intelligence.

The SOS Intelligence platform and API are a great resource for information on the darkweb and monitoring threats. It also allows us to quickly search bitcoin addresses, email addresses and other artifacts on the darkweb that we are investigating. I am really impressed with the product and the great work they are doing!
